Income	4 divers at £15/per diver = £60
Total hours on engine	46.5

Images

Tim and Andrew' bubbles disturbing the water surface!

Jenny and Sue enjoying the sun and Bahamas like water....

Boat and prop in good order

Underwater very murky but nevertheless lots of life on the wreck and enjoyable dive. *My particular thanks to Jenny and Andrew for their kind efforts to get their box of tape to make some kind of repair to my left wrist seal which gave up after only 25 dives from new!* I did get a dive but was soaked, though didn't mind about that as it helped keep me cool on a nice hot sunny day. Tide was running when we shotted the wreck and had to wait for slack. I know that the diamonds don't apply to individual wrecks so until the model is available, I will do some interpolation to improve the timing for individual sites. Any reports of timing are most welcome as that will help with accuracy.
